Bridging the gap between design and development to facilitate seamless collaboration across stakeholders, UX designers and developers to build meaningful accessible experiences and products.

Areas of Proficiencies...

Component-Driven Architecture • Coloristic Thinking • UI Frameworks best practices • UI Testing best practices • Qualitative Research • Human-Centered Design • Information Architecture • Rapid Prototyping and POCs • Fostering Collaboration and Communication Across Teams • Design System and UI Library implementation • Accessibility best practices

Tools

• HTML5 • CSS • JavaScript • TypeScript • Node • React • Angular • Jest • Jasmine • SASS • Tailwind • Storybook • NPM • Cypress • AXE • Lighthouse • VoiceOver • Confluence • Jira • Bitbucket • Git • Github • Figma • Miro

Professional Experience...

Cetera Financial Group, El Segundo, CA - Principal Design Technologist, UI Product & Experience Owner

2023 - 2024

- I took charge of managing the UI Components Library, ensuring smooth teamwork among stakeholders, UX designers, and developers from start to finish.
- Using tools like Storybook, Angular, and Angular Material UI, I developed reusable components for user interfaces.
- I worked with designers and developers to make sure these parts were easy to use and adhered to the Design System.

Ally Financial, Charlotte, NC - Senior UI Developer

2021 - 2022

- I led a major update of our company's old Enterprise application using React, Git, Bitbucket, and Jira. We gradually switched from Ember to React, which improved how the app runs, made it easier to maintain, and streamlined our front-end technology across the entire organization.

St Jude Children (Alsac), Memphis, TN - Mid UI Developer

2020 - 2021

- I used React, Java, JSP templates, Jest, SASS, Storybook, Maven, Adobe Experience Manager, and an internal Material UI Components Library to create, update, and test customized AEM components. This helped the Digital Marketing Team quickly build web-based fundraising and promotional events, cutting down the time needed from weeks to just days to promote.

Code Crew, Memphis, TN - Programming Instructor

2018 - 2020

- I taught and guided students and teacher assistants using Code.org, App Inventor, Swift Playground, PowerPoint, and techniques like understanding different learning styles, public-speaking, and empathetic communication. As a result, 84% of teacher assistants advanced to become full-time instructors, and 93% of students stayed enrolled in the course.

FedEx Services, Memphis, TN - UX/UI Designer & UI Developer

2019 - 2020

- I created, improved, and tested the FedEx Design System components and documentations using Adobe Creative Suite, Sketch, Invision, and Figma. This made sure they met accessibility standards, worked well on different digital devices, and followed the best ways to develop them.
- I planned, built, and led the development of an internal web app using Windows 10, Adobe Dreamweaver, WINSCP, HTML5, CSS3, and JavaScript. The app combined Sharepoint documents into a handbook for MVP approvals. Within two months, active users increased by 28%, and initial submission approvals rose by 32%.

Education...

Bachelor of Science in Coloristics (Psychology), Dominican University of CA

Bachelor of Fine Arts in Graphic Design, Dominican University of CA

UX Research & UX Design Programs, General Assembly

Full-Stack Program, The IronYard

CS50, Harvard Extension School

MS-740 - Microsoft Front End Certification, Microsoft
